

Test & Measurement

We deliver commercial off-the-shelf and custom-engineered **Test & Measurement solutions** for every stage, from R&D to full-scale production, ensuring **accuracy, reliability** and **compliance** with the **highest industry standards**.

MILEXIA[®]

MILEXIA®

About Milexia

Milexia is the **fastest growing** Pan-European leader in the distribution and integration of high technology components and systems, such as **Electronics, Scientific Instrumentation, Satcom** and **Embedded systems**.

Our **Test & Measurement division** combines engineering expertise with a network of world-leading partners to deliver **precision, reliability** and **innovation**.

Our Test & Measurement Capabilities

With a **broad range of solutions** for test benches and strong engineering expertise, we support our customers with bespoke configurations **adapted to their exact requirements**.

Proven Reliability

Built with proven components and strict validation, our solutions ensure reliable performance and long-term stability in demanding environments.

Quality Assurance

We guarantee accuracy and reliability through rigorous testing, validation and compliance with industry standards.

Lifecycle Support

Beyond products, we support customers across the lifecycle – from project definition and specifications, through design and configuration, to delivery, integration and ongoing services.

Tailored Precision

With decades of expertise in measurement and engineering, we design and supply custom solutions and COTS products for test benches in Aerospace, Defence, Space, Energy, Transportation, Medical and Quantum Computing.

Engineering Expertise

With strong knowledge of industrial workflows, we deliver solutions for test benches that support every stage – from R&D to full-scale production.

Our Solutions

Through **strong partnerships in Test & Measurement**, Milexia provides solutions for test benches – from modular set-ups to comprehensive instrumentation, **servicing diverse needs**.

Our process begins with a **clear understanding** of each customer's testing requirements, enabling us to configure the **most suitable instruments and architectures** for the application.

Leveraging a broad network of trusted manufacturers, we assemble optimised solutions that support every stage – from R&D to production – across diverse industries and use cases.

Our Solutions include:

→ Flexible Configurations

From multi-subsystem assemblies tailored to complex requirements to dedicated modules designed for specific test needs.

→ Mixed Technologies

Combining different domains (e.g. RF with communication protocols) within a single solution.

→ Scalable Solutions

Supporting applications from early R&D to qualification and production.

→ Future Expansion

A broader portfolio of solutions continuously evolving

Contact Milexia

Contact our teams today for further advice and information.

Whether you're looking for a high-quality component, product or service or need an innovative, bespoke solution, our teams in France, Italy, Spain, UK, Germany, Denmark, Norway, Sweden and Finland are here to help.
